PROFILE

Software Engineering student entering my final year at the Arabian University for Science and Technology. Passionate about software development, web and mobile applications, and problem-solving. I enjoy building practical projects using modern technologies and have growing experience in cloud computing with AWS. Known for being responsible, adaptable, and detail-oriented, with a strong drive to keep learning and improving my technical skills.

EDUCATION

Arabian University for science and Technology | 2023-2027 Saudi Arabia, Jeddah
Bachelor of Computer programming July, 2023 - May, 2027

PROJECTS

- Weather App (Using API)

Developed a web application that displays real-time weather information by integrating with a weather API. The app allows users to search for cities and view current weather conditions, temperature, humidity, and more.

- Personal Portfolio Website

Designed and developed a responsive personal portfolio website to showcase my projects, skills, and background using modern web technologies. The project also includes an integrated chatbot built using Python and JavaScript to enhance user interaction and provide a dynamic experience.

- AirSense - ESP32 Sensor Data Sender

An IoT project that sends sensor readings over WiFi using ESP32 and Arduino IDE.
